College Now: Medical Terminology 1	No	.5	3
Medical Terminology 2	No	.5	
College Now: Health Office Procedures	No	.5	3
College Now or Willamette Promise: Anatomy and Physiology	No	1.0	6
Willamette Promise: Exploration of Health Careers	No	.5	2

14154 - College Now: Medical Terminology 1

Prerequisite: Biology

Grade Levels: 10-12 or Instructor Approval

1 Semester

This course is an introduction to medical terminology, designed to increase familiarity with medical terms while reviewing basic anatomy and physiology. The focus of this course is to develop an understanding of the structure of medical words: prefixes, suffixes, roots and combining forms and apply this knowledge to the analysis of unknown words. The course is broken into 10 units around specific physiological systems. **Students in this class may receive “College Now” credit through Lane Community College by completing this course.**

141542 Medical Terminology 2

Prerequisite: Medical Terminology 1

Grade Levels: 11-12 or

Instructor Approval 1

Semester

In Medical Terminology 2, we will continue to build on the foundation of knowledge developed in Medical Terminology 1. Students will gain a deeper understanding of body organs, systems and their related terminology and explore the origin of terms and the use of anatomical, general, operative, and symptomatic terms using a variety of case-based and experiential learning techniques.

14002 - College Now: Health Office Procedures

Prerequisite: Biology

Grade Levels: 10-12 or

Instructor Approval 1

Semester

This course deals with the principles of filing and records management specifically for the medical facility- Legal and ethical concerns of confidentiality & privacy- Fundamentals of client reception, appointment scheduling, telephone techniques and letter composition. **Students in this class may receive “College Now” credit through Lane Community College by completing this course.**

03053/03053B - College Now and Willamette Promise: Anatomy and Physiology

Prerequisite: Biology. Chemistry is strongly

recommended. Grade Levels: 11-12 or

Instructor Approval

Full Year

This course will introduce the student to human based anatomy (structures) and physiology. The systems of the body will be covered. This course is designed for students who are considering a medical, dental, veterinary, or related field as well as students interested in the sciences. **Students in this class may receive “College Now” credit through Lane Community College or “Willamette Promise” credit through OIT.**

14001- Willamette Promise: Exploration of Health Care Careers

Grade Levels: 9-12

1 Semester

This course will expose students to a variety of health care professions and includes survey of medical and health-related occupations, including biomedical sciences and discussion of health care structure, private and public entities, the research community and trends in health education and practice. **Students in this class may receive “Willamette Promise” credit through OIT.**
