CDC COVID-19 Community Levels

Community Level	Mask Recommendation
Low	No recommendation
Medium	If you are immunocompromised or high risk for severe disease, talk to your healthcare provider about whether you need to wear a mask
High	Wear a well-fitting mask indoors in public, regardless of vaccination status (including in K-12 schools and other indoor community settings)

Map as of 3/7/22

CDC's [COVID-19 Community Levels](#) are a new tool to help communities decide what prevention steps to take based on the latest data.

- On 3/4/22, Lane County moved from the “high” to “medium” community level.
- The OHSU 7-day forecast (3/6/22-3/13/22) is the Lane County will move to “Low” within the CDC COVID-19 Community Levels metrics.

Oregon's Epi Curve

Oregon Department of Education

6

The OHSU Oregon's EPI Curve graph illustrates that the omicron COVID transmission rate peaked and then rapidly declined.

The peak of the Omicron variant occurred in mid-January where it plateaued through mid-February.

After mid-February, the COVID case rates sharply declined to levels last seen prior to the Delta variant in August 2021.

Data retrieved 2/28/22

Census Forecast-Primary Scenario

Below are dates that census is expected to reach certain levels.

Level	Date
500	3/3/2022
400	3/12/2022
300	3/21/2022
200	4/2/2022
100	4/23/2022

23 OHSU COVID Forecast Model

* while the actual recovery period for Omicron is shorter than 14, this is needed to remain constant with original virus in order to implement the effects of behavioral changes

Data retrieved 2/28/22

The OHSU Hospitalizations by Severity Graph illustrates that hospitalizations in Oregon due to COVID-19 are decreasing.

- Hospitalization by severity peaked in mid-January to mid-February to above 1100 COVID-19 positive patients.
- The last 7-day hospitalization data shows that Oregon is below 400 severe hospitalizations. OHSU projects that hospitalizations by the end of March will be less than 200.

Population Immunity Estimates

Oregon Department of Education

9

The OHSU Population Immunity Estimates Graph illustrates that the percentage of Oregon population for COVID-19 immunization rate is at 83% as of 2/28/2022.

- In February 2021, over 4 million Oregon residents were susceptible to the COVID virus.
- 76% of the population in Oregon has recovered from COVID or are fully vaccinated.
- 7% of the population in Oregon are currently infected (positive).
- 18% of the population in Oregon are not infected and are unvaccinated, making them susceptible to contracting the COVID virus.

Data retrieved 2/28/22

CSD Student Attendance

CSD Student Attendance graph comparison illustrates that student attendance rates since the Omicron peak have improved markedly.

- Attendance levels during the first week of March 2022 have been comparable to average attendance levels seen prior to the pandemic. The 2020 monthly attendance rates are shown for reference.

CSD Community Mask Requirement Survey

The Community Mask Requirement Survey data illustrates that an overwhelming majority of the CSD community would feel comfortable moving to a mask-optional school environment for staff and students.

- Total # of Respondents: 507
- Total % of Respondents favoring optional face coverings: 87.8%
